

*CIT* (7) (c) a phase change material changing from its initial phase to its final phase responsive to the absorption of heat disposed in said enclosed cavity and in said porous material.

*Cancels* claims 3 and 4 without prejudice.

*Amend claim 5 as follows:*

5. (Amended) The heat sink of claim [3] 1 wherein *said porous heat dissipating medium* is aluminum.

*Amend claim 6 as follows:*

6. (Amended) The heat sink of claim [4] 2 wherein *said porous material medium* is aluminum.

*Cancels* claims 9 and 10 without prejudice.

*Add the following claims:*

21. The heat sink of claim 1 wherein said phase change material is a wax.

22. The heat sink of claim 2 wherein said phase change material is a wax.

23. The heat sink of claim 11 wherein said phase change material is a wax.
